

From Traditional to Real-Time:

How We
Transform Allianz
with Eventing

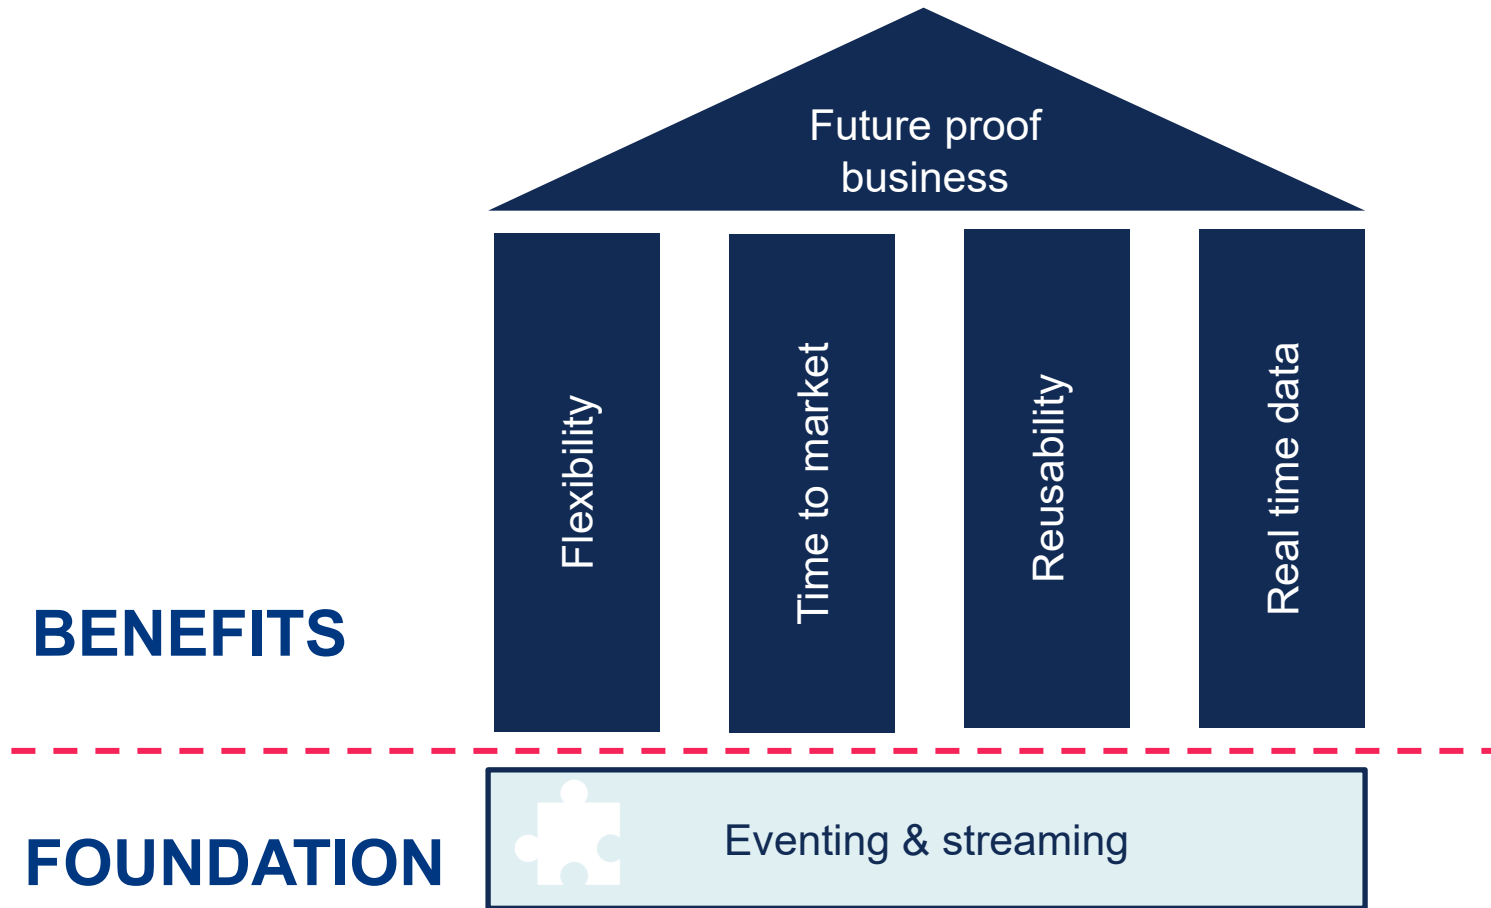

What most companies think digital transformation is:

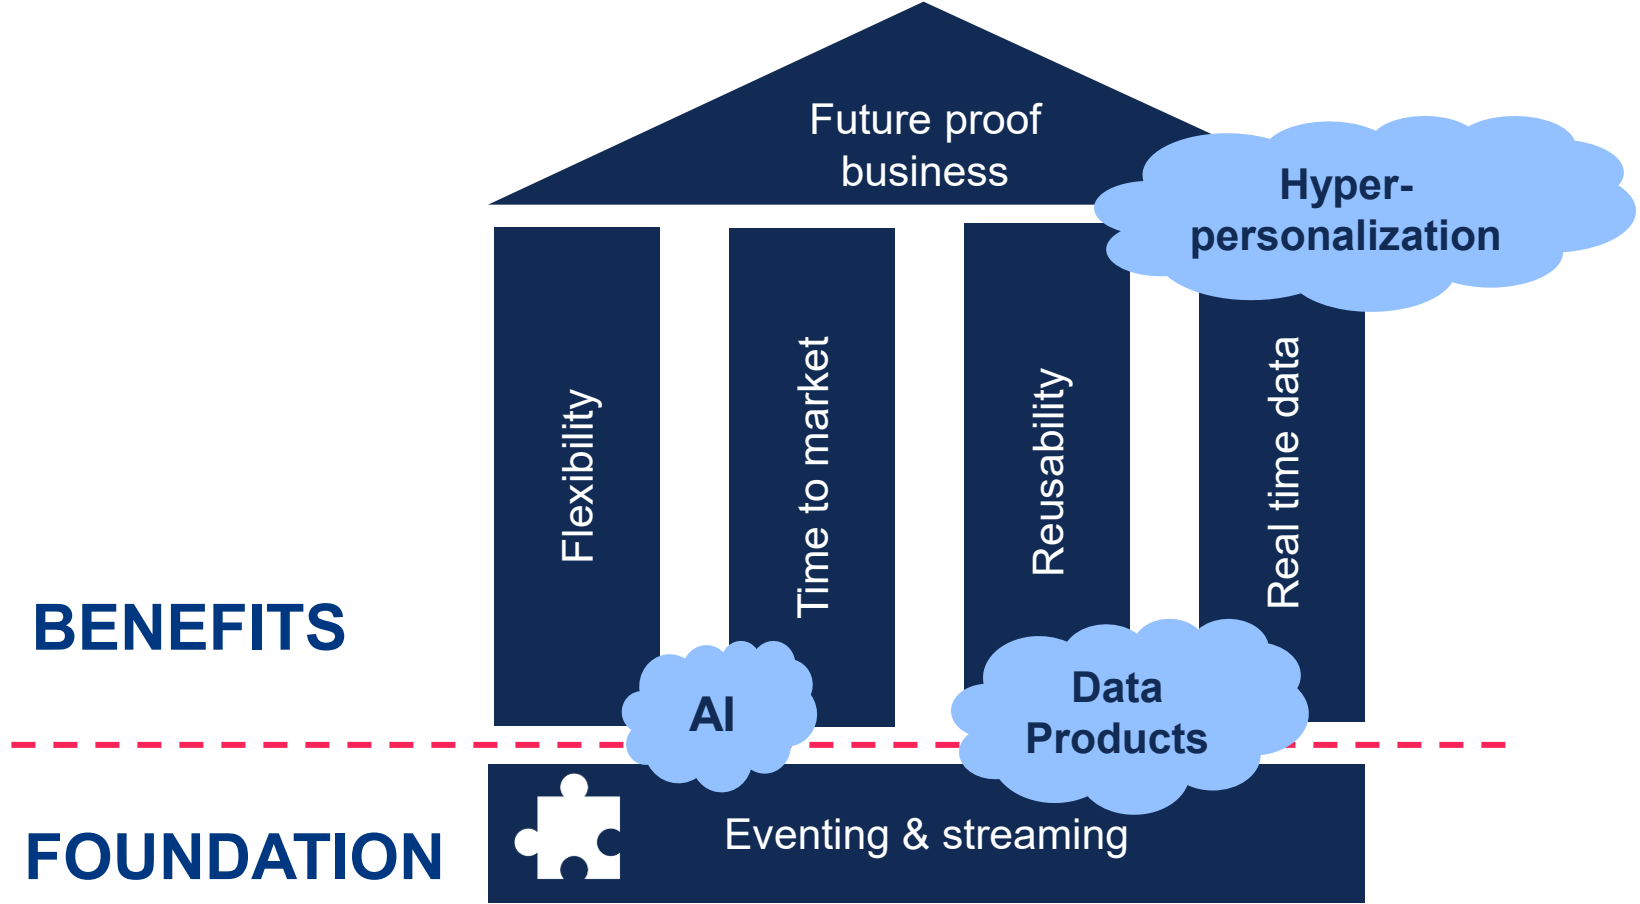

What digital transformation is really about:

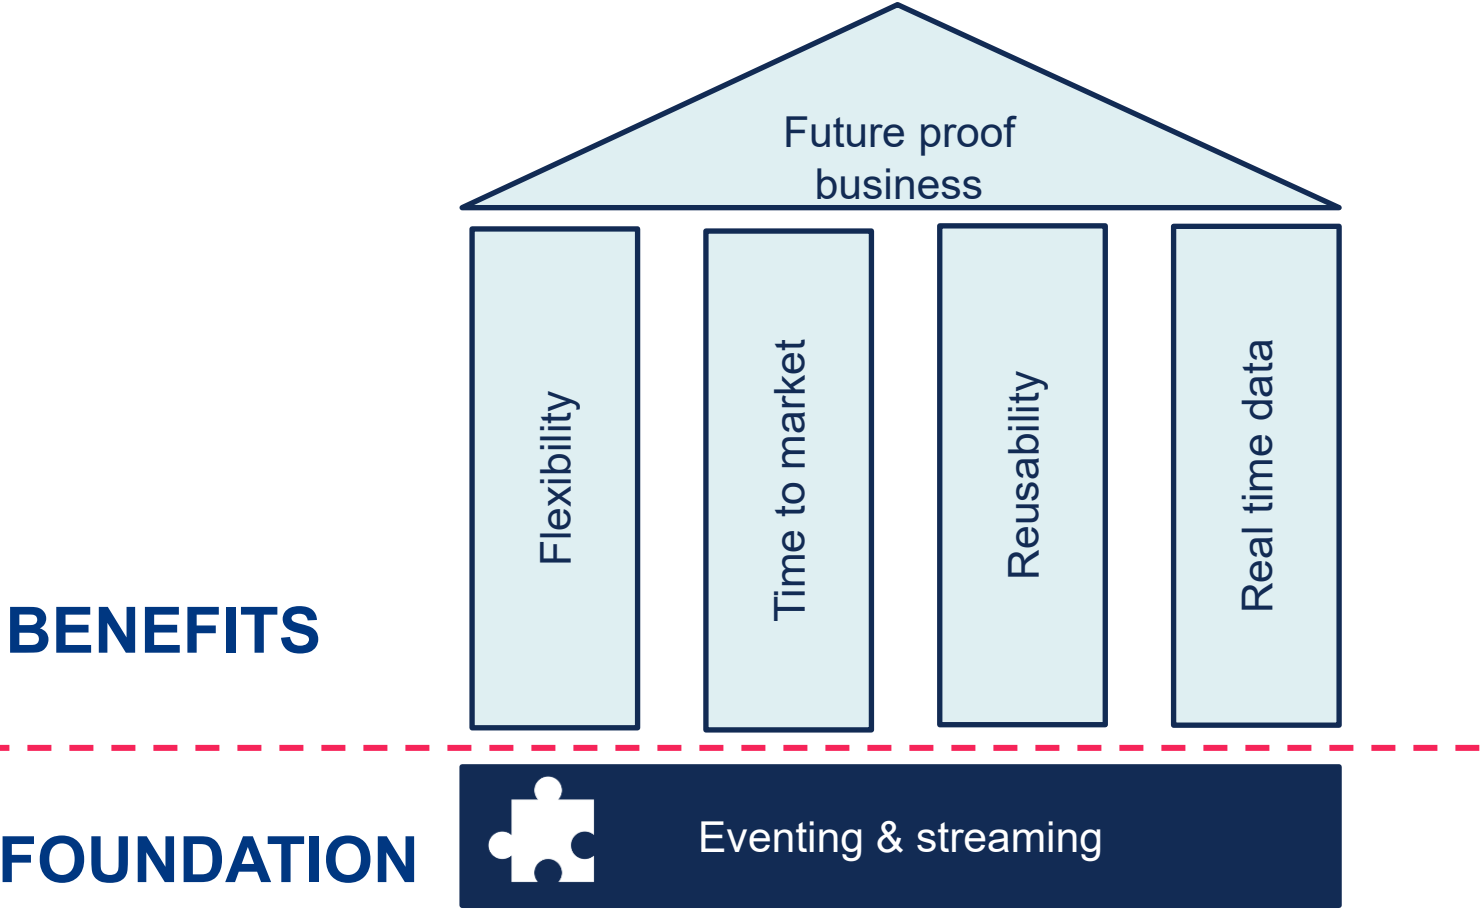

The Temple of Benefits

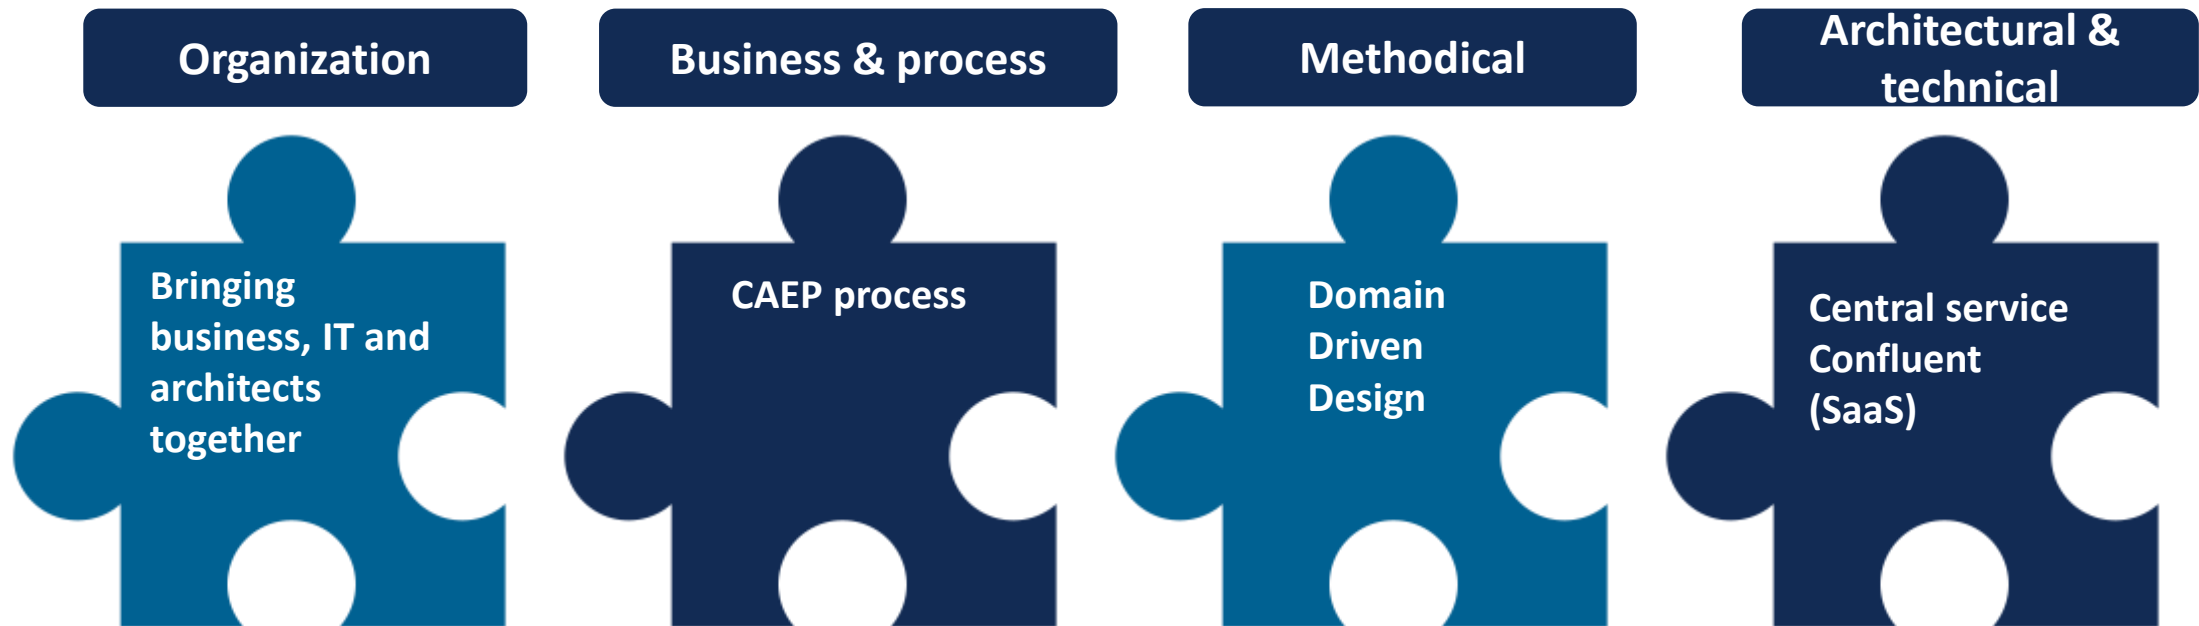

The Temple of Benefits

The Temple of Benefits

We focus on 4 areas

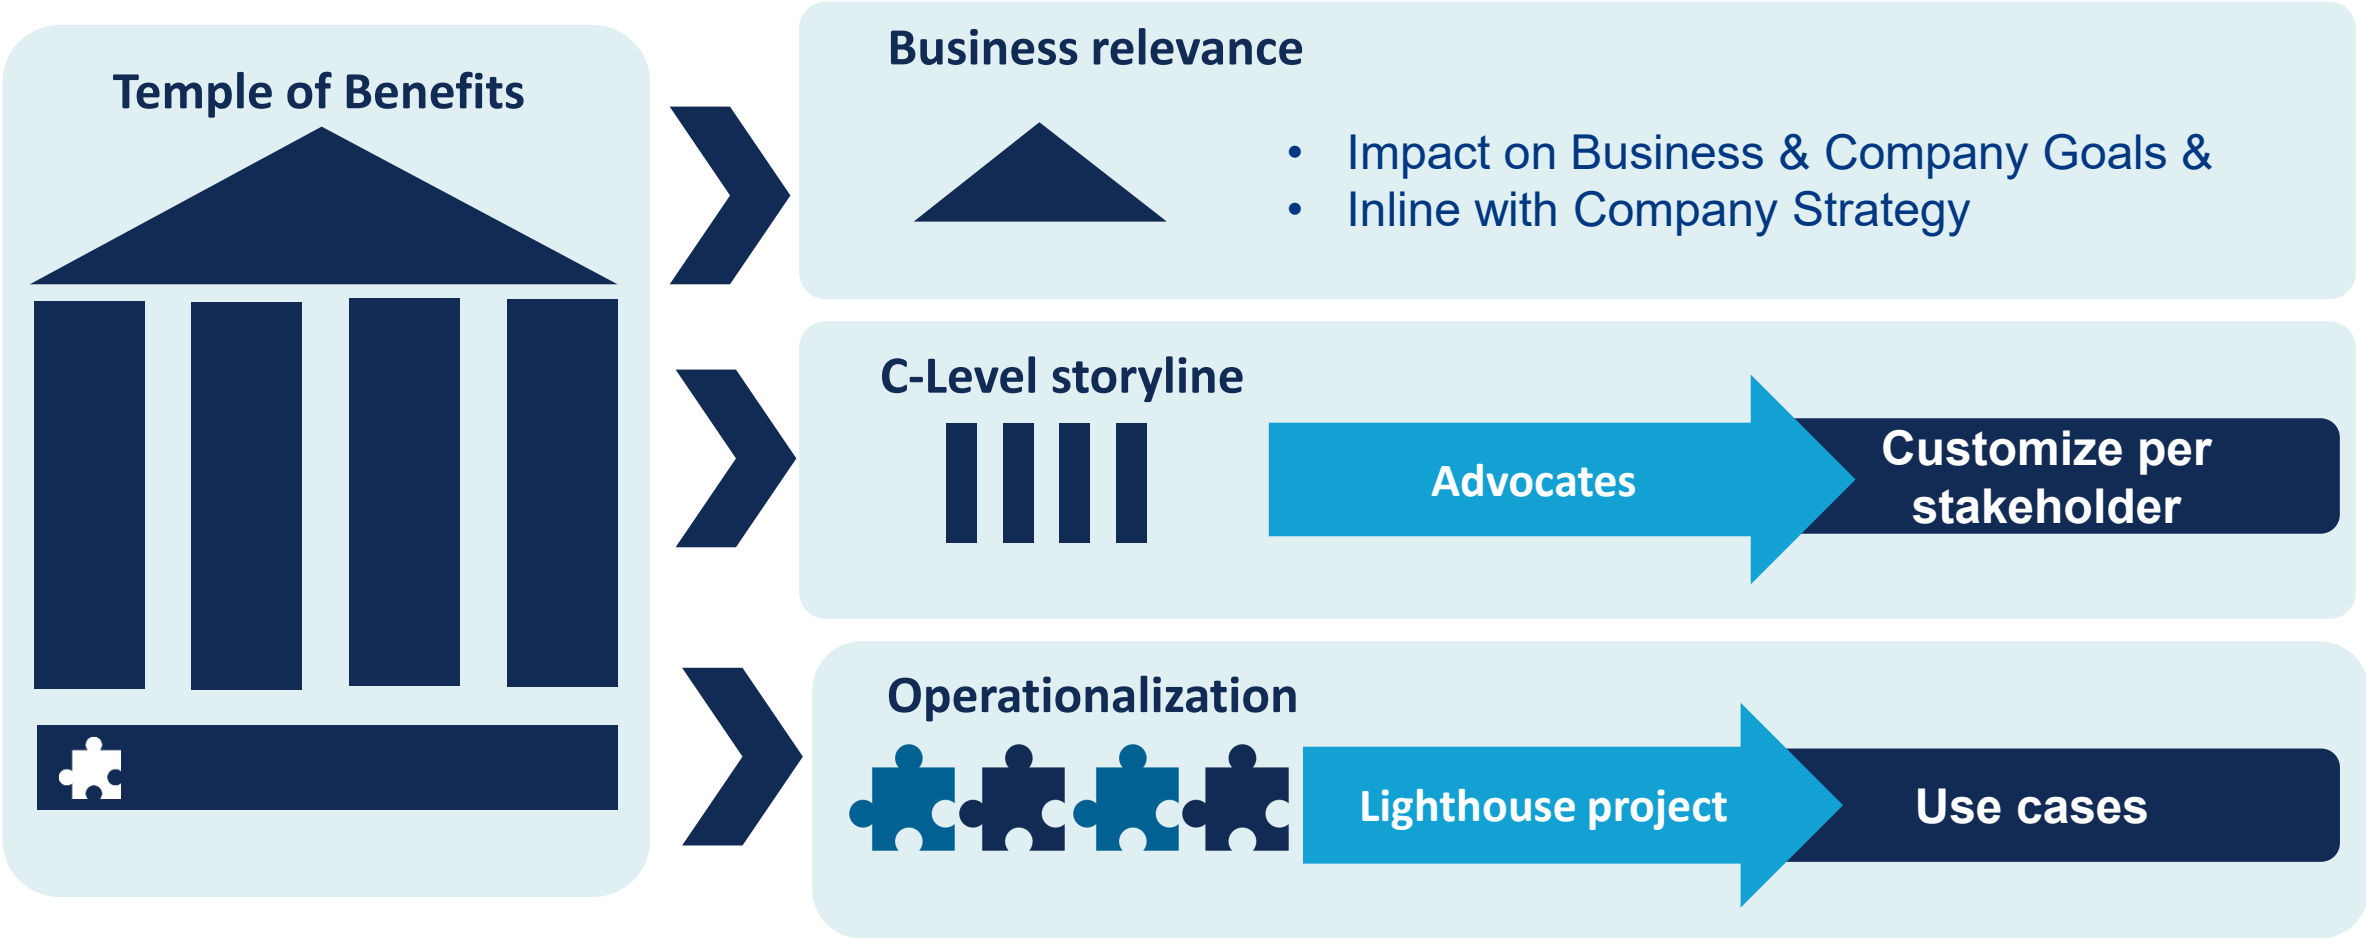

Needs the right maturity to successfully bring everything together

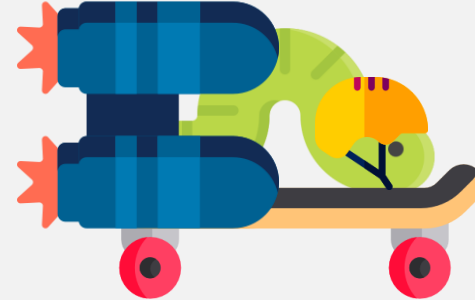

SaaS-Solution based on Confluent Cloud was a strategic choice

All concludes in a framework to communicate and scale

What most companies think it is:

What digital transformation is really about:

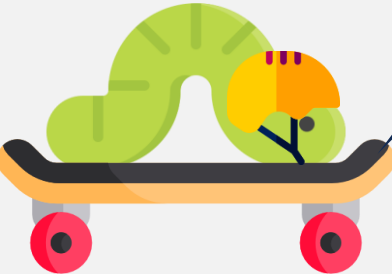

Selected figures* of this approach

- All of the use cases achieved higher alignment with business needs towards future capabilities.
- Approx. 25% of the use cases in the process were better aligned with actual business needs.
- Approx. 50% of the use cases demonstrated a significant reduction in components and architectural complexity. This led to cost savings and avoided sunk costs.

The core system also needs to get up to speed

Enable Eventing on core system

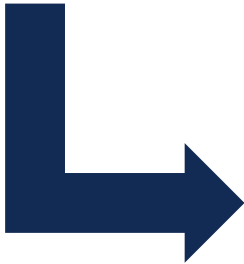

Eventing on the monolith

Managed streaming on monolith

To enable the real transformation on the other systems
